

## Winter Covid Testing Instructions

In order for testing to go as smoothly as possible, we ask that you follow a few simple instructions and exercise patience throughout the process.

Instructions:

\*You must have completed a Telemedicine Visit with a FAFP Provider prior to arriving at the testing trailer.

1. It is critical to maintain **proper traffic control** in the parking lot. Please drive the designated path marked by the **red arrows**. Do not block the path of another car.
2. You will **arrive at your assigned time**. A single file line will form at the trailer. The staff will be using the window at the rear of the trailer to complete as much of the testing as possible. Note: Late arrivals will be bumped to the next available testing time slot.
3. You will **remain in your car** the entire time.
4. Your **mask should be on** when interacting with FAFP staff. To complete the nasal swab, you will expose your nose, but keep your mouth covered.
